

Saving the world - Tony Pearce

A lot of people think you're indulging in conspiracy theories when you talk about Bill Gates.

But Bill Gates himself has said certain things which are not the result of a conspiracy theory, they're what he's saying himself about what he's intending and what his plan is.

He's already talking about the next round, and the need to plan for a new tests, treatments, new vaccines after the end of the Covid 19 pandemic, mapping out a battle plan for the next time a dangerous new pathogen appears.

In the annual letter from the Bill Gates (Bill and Melinda Gates Foundation), the Microsoft founder, called for billions of dollars in investments to develop a global alert system for emerging germs, and build the capacity to respond quickly.

"We can't afford to be caught flat-footed again," Gates wrote. *"To prevent the hardship of this last year from happening again, pandemic preparedness must be taken as seriously as we take the threat of war."*

So, he's preparing for the next round. Supposing the next round comes, they will then move into the next phase of control.

Also, what's interesting is that, according to Gates, this campaign has got to be linked to a campaign to save the world from the environmental crisis. Therefore, let's introduce another issue which is going to become more and more relevant in the coming year and in the coming decade as well.

When we say Bill Gates wants to save the world, some people say: *'you're saying he's the Messiah or he's some Antichrist figure'*. No, we're just saying what the people who support him say. It's not a mad conspiracy theory. There's a news magazine called Wired Magazine which has praised Bill Gates as "the man to save the world". And he's going to save the world by helping to reduce carbon emissions. The article investigates how Gates plans to achieve a "zero carbon" world and promotes his new book which argues *"it's time we make real, societal, economic and logistic changes to our way of life to avoid disaster."*

According to Gates, the planet needs to reach zero carbon emissions in order to avoid catastrophe.

So, this is the next thing you're going to see coming down the road. I'm going to tell you we've got to move towards zero carbon emissions. What does that mean? What causes carbon emissions? Driving cars, planes, electricity produced by coal, gas, etc., heating your homes and, apparently, eating meat as well. Because one of the issues is that eating meat is something which is adding to CO2 emissions in the world.

It's interesting that Bill Gates has started buying up farmland in America. He's bought up 242,000 acres of farmland in the U.S., making him the biggest owner of farmland in America. He said that eating meat is a major source of carbon emissions causing global warming.

So, we should change our eating habits, and one proposal is to create synthetic beef using fungus to make sausages and yogurt. And there's a growing thing about meat eating, and it seems you shouldn't do that. Gates' critics are saying that he's monopolizing or attempting to move to monopolise global food production and bring in some kind of control system through a, and I quote: "dark form of philanthropic capitalism based on biopiracy and corporate biopiracy". Big, long words! That basically means controlling the food system.

There's another project I'm going to bring into the discussion which is worth noting here.

On January the 29th, the German parliament, the *Bundestag* moved to ratify what they call Agenda ID 2020 which is a centralized data collection program which will be used ultimately to identify all of humanity. Under this program, the private data of all Germans and, eventually that of all humans, will be made available to every government agency, police department, and private sector company that wants it. *"It covers all that is known about an individual citizen, now up to 200 points of information and possibly more as time goes on, from your bank account to your shopping habits, health records (vaccination records, of course), your political inclinations, and probably even your dating habits and other entries into your private sphere"*, writes Peter Koenig for Global Research (Canada).

German parliament ratifies Agenda ID2020 and Bill Gates' "vaccination package" for global depopulation

German parliament ratifies Agenda ID2020 and Bill Gates' "vaccination package" for global depopulation By [Ethan Huff](#) for News Target

On Jan. 29, the German parliament [ratified the implementation of Agenda ID2020](#), the next phase of the global Mark of the Beast rollout being ushered in on the back of the Wuhan coronavirus (COVID-19) "pandemic."

This centralized general electronic data collection program will profile every citizen in Germany and grant access to every government agency, police department, and three-letter agency, as well as to the private sector.

Up to 200 points of information, and possibly more as time goes on, will be included in the program. These include people's bank accounts, shopping habits, health records, including vaccination records, political inclinations, and probably even dating habits.

If the government can use it against you, Germany wants to house it in the Agenda ID2020 database, which was designed by none other than billionaire eugenicist Bill Gates as part of his "vaccination package."

<https://thedailycoin.org/2021/02/15/german-parliament-ratifies-agenda-id2020-and-bill-gates-vaccination-package-for-global-depopulation/>

Now, this program is designed by none other than Bill Gates. Agenda ID 2020 is part of a larger vaccination package sponsored by the Rockefeller Foundation, the World Economic Forum, and the Global Alliance for Vaccines and Immunization.

If you couple this together with control of the world's food supply, you can see it would be a way in which submission to the dictates of the new world order will be linked to the ability to buy and sell food and feed yourself and your family.

So, you've got global ID, food production, passes for entry into society. How does that all come together? Maybe those who say this has something to do with the emerging 666 system and **Revelation 13** are not so far from the truth. And some fear that it'll be part of a plot to bring in a new world order, the Global Reset in which we'll lose most of our freedom of speech, belief, ability to travel, ability to express our opinions, and end up ultimately being controlled by a Big Brother techno-system that monitors our movements, our opinions, and controls our ability to function in society.

If you've read my last Light for the Last Days magazine or listened to my last talk, you may remember I mentioned a man called Klaus Schwab who is talking about a Global Reset after the Covid emergency, in which it is said that *"Every country, from the United States to China, must participate, and every industry, from oil and gas to tech, must be transformed. In short, we need a Great Reset of capitalism. ... for global leaders to shape the future state of global relations, the direction of national economies, the priorities of societies, the nature of business models and the management of a global commons"*.

He said this is only going to come about through effective global governance.

So, again, you've got big powerful people. Now, you might ask: 'Who is Klaus Schwab? What's he got to do with it?' He's got a lot to do with it. He runs the World Economic Foundation. They have links with all of the major governments, including the UN, the IMF, and the EU, and with all kinds of big power systems who are all coming together and actually agreeing with what he's saying.

And they're saying that we need to use Covid, which is, and I quote: *"A useful stepping stone"* in the next phase of the plan to reset the world economy, control human activity, and push for global governments necessary to create a new green world working for the elimination of carbon emissions (coal, gas, and oil) to save the planet from man-made (anthropomorphic) global warming. He's got the support of world leaders including Kristalina Georgiava, Managing Director of the International Monetary Fund, the U.N. Secretary General, Antonio Guterres, heads of government including our own Boris Johnson, the EU's Ursula von der Leyen, U.S. President Biden, and members of his administration in the U.S.

And incidentally, one reason why they had to get rid of Trump was because he was opposing it. So, you get rid of Trump, now you've got a government in the U.S. which is going to comply with the whole plan. Leaders of Canada, New Zealand, Australia, are all making statements and pushing in the same direction while saying that *'you've got to use the pandemic as a step towards the next phase'* which is to take control over the economies and to do this in order to save the world from global warming.

As Schwab has said: *"At first glance, the pandemic and the environment might seem to be only 'distantly related cousins'; but they are much closer and more intertwined than we think. One of the connections is that big powers have used both issues to make people terrified of things coming that will destroy their lives (Covid or the environment crisis). So they need to accept the changes proposed by 'global governance.'"*
